

25 Years IC

Metrohm Ion Chromatography

Learn more about 25 years
Metrohm ion chromatography!

 **Metrohm**

1987

Metrohm makes ion chromatography affordable

«*The mid-1980's. Our mission: develop an affordable ion chromatograph with a minimal footprint, simple to use, providing outstanding measurements.*»

Walter Terzer, R&D ion chromatography, Metrohm AG

«*The 690 Ion Chromatograph was engineered for people without a PhD in chemistry, too. And it was so rugged that quite a few 690 IC's are used even today. Most importantly: At the time, it cost only half as much as our competitor's product!*»

*Dr. Markus Läubli, R&D ion chromatography,
Metrohm AG*

1997

Metrohm invents Compact IC

«The 1990's. People start to care about the environment. Authorities impose quantitative limits on the presence of many substances, most of which must be detected down to trace levels. Metrohm builds the perfect tool for this: the 761 Compact IC.»

*Dr. Helwig Schäfer, retired Head of
R&D ion chromatography, Metrohm AG*

2007

Metrohm makes ion chromatography intelligent

«An IC system so smart that it can make logical decisions on its own? For example, diluting samples automatically, if the concentration of your target analyte is too high and results would fall outside the calibrated range?»

Dr. Markus Läubli, R&D ion chromatography, Metrohm AG

«This is exactly what the 850 Professional IC and MagIC Net™ software can do. In fact, our Professional IC system takes care of the liquid handling & sample preparation with hardly any work required from the user!»

*Dr. Andrea Wille, Manager Competence Center
Ion Chromatography, Metrohm AG*

How will the story continue?

Metrohm invents the IC of the future

«You will understand that we are reluctant to disclose too much here. However, this much we can say: The Metrohm IC of the future will be even more compact. It will integrate even more automated sample preparation & liquid handling. And it will support you with even more intelligence to save you from any routine work prior and after analysis!»

*Dr. Thomas Moritz, Head of R&D ion chromatography,
Metrohm AG*

Ion chromatography
simple, robust, and affordable

«*Metrohm did not invent ion chromatography. However, during the last 25 years we have made this analytical technique simple to use, robust, and above all, affordable. In short, we have brought ion chromatography to everyone!*»

*Dr. Markus Läubli, R&D ion chromatography,
Metrohm AG*
