

Symposium «Analytical Concepts for the PCB and Semiconductor Industry»

February, 24th – 26th, 2014

Metrohm International Headquarters
Herisau, Switzerland

Welcome at the Metrohm Academy!

Metrohm is pleased to invite you to a 3-day symposium focusing on analytical challenges in the PCB and semiconductor industry. Get to know our very latest applications and instrumentation for your business, discuss your questions with our experts and peers from your industry, and enjoy three days of learning in the beautiful Appenzellerland. Topics of presentations and practical demonstrations are:

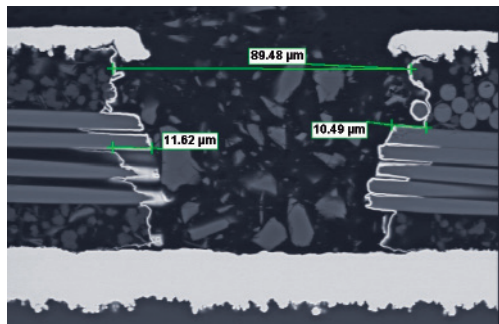

- Additive analysis by CVS and CPVS in acidic copper electrolytes with focus on quality management and data interpretation
- Improved convenience with new automation possibilities for additive determination with CVS
- Ultratrace analysis of heavy metals by voltammetry
- Determination of lead and antimony in electroless nickel electrolytes
- Fully automated complexometric titrations of various metals
- Determination of halogens in PCBs by Combustion IC (RoHS compliancy)
- Ionic contaminants on PCBs/PCAs by ion chromatography (IPC-TM-650)
- And more

Guest speakers include specialists from Metrohm Applikon, Metrohm Autolab, as well as experts from ENTHONE, ATOTECH, and others.

The maximum number of participants is limited to 50 persons. The registration fee of CHF 1140 includes:

- free participation in all presentations & demonstrations
- free lunches and a dinner event
- an afternoon excursion to the beautiful Appenzellerland
- free accommodation (3 nights) in a nearby hotel (St.Gallen)
- free transfer by minibus (from your hotel to Metrohm Academy and back) every morning and evening

We are looking forward to seeing you in Herisau!

The new Metrohm Academy
